World Environment Day 2005
San Francisco, California, USA

Apsley

To celebrate World Environment Day, the Chandos Lake Canoe and Kayak Club invites cottagers to get out on their canoes or kayaks and paddle.

For more information, please contact:

**United Nations,
Together We Can**

Brampton, Ontario

As part of their commitment to reducing pollution and waste prevention, the Community Environment Alliance we will be hosting "Let's e-cycle" days in Peel to mark World Environment Day.

The event focuses on reducing the generation of e-waste in Peel which has become a prime concern in the community. Individuals and businesses will be able to drop off their used equipment at one of the event locations and get an overview on the issue of e-waste and its potential impacts. As students constitute the primary consumers of electronic gadgets, they will be engaged in discussions on what the problem is and how we can address it to make the community safe, healthy and sustainable. In this vein, there will be a student contest on the subject: Electronic waste : Present and future: Am I Doing It Right? Students have to identify key concerns around e-waste and provide a potentially viable solution to deal with it. Students can submit entries in visual, collage or written format. Three winners will be selected from three categories -- elementary, middle and high school -- and will receive prizes and recognition.

For more information, please contact:
